

Risk Assessments

This service will benefit anyone looking to organise an event no matter how large or small. At Pennine Events, due to the range and complexity of the event we have managed, we have experience of and are familiar with all manner of potential hazards. Therefore, using Pennine Events to conduct your risk assessment will provide you with complete piece of mind, value for money, realistic and innovative mitigation and, when implemented, leads to a truly safe event.

A risk assessment is an integral and essential part of the development and subsequently the delivery of a safe and successful event of any type and scale. Assessment underpins all key recommendations for mitigation and control of any identified significant hazards that are a cause for concern to the organisation responsible for a particular event or aspect of it. Such recommendations should be implemented to the best of that organisations ability by doing what is reasonably practicable and within the scope of its responsibilities.

Our process of carrying out a risk assessment always includes full site and route physical surveys, desk-top analysis of all relevant information and plans, such as linked events, environmental factors, other agencies and internal scrutiny.

Our processes will cover everything involved at the event or planning the event such as: site/route, set-up, de-rig, structures, financial, crowd, event operations, communication and weather factors. With an impeccable reputation and track record on safety at events, we are confident that we can manage and oversee the implementation of your risk assessment requirements.
